22nd June 2016. Re: Foynes 15-foot Gandelow

The next five pages contain the photos and sketches of the 'experimental' 15-foot gandelow made in 2012 for the Foynes Flying Boat Museum.

I have annotated the photos with extra dimensions and some notes based on my recollections from that time.

These *approximate* dimensions are ***only*** for the version with a dory-style 'tombstone' transom. You'll need boat-building experience to interpret them!

Note that I am in the process of building a different version (with a butterfly plank stern) – and detailed plans, dimensions Table of Offsets and templates for that type will be published later in the year.

With Compliments, Patrick Beautement
